www.ThinkForex.com

Auckland, New Zealand, October 20, 2011 - To support our growing services and offerings we have expanded our communication effort to ensure all demo and live clients are informed of new ThinkForex developments. Please continue to monitor your email for important ThinkForex communications.

Free Market Commentary

Free market commentary is now available on the main site for all demo and live account users. Previously only available to live clients, these informative videos are updated daily with market commentary covering:

- Currency Market Overview
- Pre-European Open
- Trader Commentary
- And More!

Please visit our [Market Analysis](#) page for complete market commentary.

Updated Mobile Applications

All MT4 mobile applications have been updated to align with our recent data center enhancements and our Green image. Please download & update your existing application.

Important iPhone/iPad Update

All iPhone/iPad users will need to install a new update to the iTrader app. Please visit your App store to proceed with the new update. If you have not installed the iTrader App please [Click Here](#) to begin the process. Enhancements Include:

- Improved date pickers
- Improved price pickers
- Chart options issue fixed
- Chart drawing text issue fixed
- Region format number issue fixed

Meet ThinkForex at the Money Show

Join ThinkForex at the upcoming [London Money Show](#) November 10th – 12th. ThinkForex staff members will be onsite and available at **BOOTH 507** to answer any questions and to provide information on new and upcoming features and products.

Trading Tip of the Month

One-click Trading and MT4

WebTrader can be used along side of your MT4 desktop platform for one-click trading. Combine the power of MT4 charting and indicators while executing one-click trades on WebTrader for a high-speed one-click trading solution. For more information contact your account representative.
